OFFICE OF LEGISLATIVE COUNSEL

Tuesday - 13 March 1962

25X1

25X1

	Armed Services Committee staff, who indicated he would like to have biographies for all Committee members on General Carter as seen as conveniently possible. In addition, Durden stated certainly the Committee would not be ready for a confirmation hearing until Thursday, 22 March. We will consult further on a firm date.	
25X1	Appropriations Committee staff, who was obviously pushing for approval to visit the manufacturer on the west coast in connection with OXGART. He had not made it clear before and did today that through his budget centacts in Air Force he had simply sought authorisation to make the trip and they had suggested he contact the Agency. I indicated there were a number of problems in this connection and that if he were interested in securing information on those aspects of the project which were related to the Air Force he should contact who is familiar with this. This followed my discussion with who is familiar with the Dr. Seeville who in turn had discussed this with the DCL. I assured Crosby we would be perfectly happy to brief him thoroughly on the Agency side of this situation as well as any members who are entitled to receive it. While not completely satisfied, he accepted this.	25X
